

Dr. B. U. Choudhury is currently serving as the Regional Head, ICAR Research Complex for NEH Region, Tripura Center, Tripura. He obtained his B.Sc. in Agriculture from Assam Agricultural University (Jorhat), his Masters in Soil Science from Punjab Agricultural University (Ludhiana) and earned a Ph.D. in Agricultural Physics from the Indian Agricultural Research Institute (IARI), Pusa, New Delhi. He did a year-long postdoctoral research program on soil biophysics at Rothamsted Research in Harpenden, United Kingdom, as an RI fellow. For over the past 20 years, he has been working as an ARS scientist (8 years as a principal scientist) at the Indian Council of Agricultural Research (ICAR). His research work entails mapping soil and crop resources using remote sensing & GIS, and evaluating soil carbon, land degradation, and adaptation strategies using simulation models at the regional level. He has penned over 12 books. His research has been peer-reviewed in 80 international and 80 national journals, and it has been cited more than 6100 times on Google Scholar, with an I-index of 102 and an h-index of 40.
