

## **Dr Manoranjan Mohanty**

Working as Principal Scientist (Soil Physics), ICAR-IISC, Bhopal, India. His experiences include working with many projects both national and international importance in the field of soil science, soil physics, tillage and crop residue management, integrated nutrient management in agriculture, crop simulation modelling, climate change adaptation and mitigation strategies, carbon sequestration and hyper spectral remote sensing approaches to evaluate soil quality and crop productivity. Worked with different researchers from ACIAR, Canberra, Australia; The University of Queensland, Australia; The New York University, New York, USA; ICRISAT India, and CSIRO Australia. Areas of responsibility include: overseeing editorial content and management of soil microclimate dynamics and modeling.
